

WATS II REPORT/DATA SET

**The National Report of the United States
Nancy Foster
12 October 1987**

WATS2 054

With a grant from the U.S. National Marine Fisheries Service, WIDECAST has digitized the databases and proceedings of the **Western Atlantic Turtle Symposium (WATS)** with the hope that the revitalized documents might provide a useful historical context for contemporary sea turtle management and conservation efforts in the Western Atlantic Region.

With the stated objective of serving “as a starting point for the identification of critical areas where it will be necessary to concentrate all efforts in the future”, the first Western Atlantic Turtle Symposium convened in Costa Rica (17-22 July 1983), and the second in Puerto Rico four years later (12-16 October 1987). WATS I featured National Reports from 43 political jurisdictions; 37 presented at WATS II.

WATS I opened with these words: “The talks which we started today have the multiple purpose of bringing our knowledge up to date about the biological peculiarities of the marine turtle populations of the western Atlantic; to know and analyse the scope of the National Reports prepared by the scientific and technical personnel of more than thirty nations of the region; to consider options for the orderly management of marine turtle populations; and in general to provide an adequate forum for the exchange of experiences among scientists, administrators, and individuals interested in making contributions for the preservation of this important natural resource.”

A quarter-century has passed, and the results of these historic meetings have been lost to science and to a new generation of managers and conservationists. Their unique importance in providing baseline data remains unrecognized, and their potential as a “starting point” is neither known nor appreciated.

The proceedings document what was known at the time concerning the status and distribution of nesting and foraging habitat, population sizes and trends, mortality factors, official statistics on exploitation and trade, estimated incidental catch, employment dependent on turtles, mariculture operations, public and private institutions concerned with conservation and use, legal aspects (e.g. regulations, enforcement, protected areas), and active research projects.

Despite the potential value of this information to agencies responsible for conducting stock assessments, monitoring recovery trends, safeguarding critical habitat, and evaluating conservation successes in the 21st century, the National Reports submitted to WATS II were not included in the published proceedings and, until now, have existed only in the private libraries of a handful of agencies and symposium participants. To help ensure the legacy of these symposia, we have digitized the entire proceedings – including National Reports, plenary presentations and panels, species synopses, and annotated bibliographies from both meetings – and posted them online at <http://www.widecast.org/What/RegionalPrograms.html>.

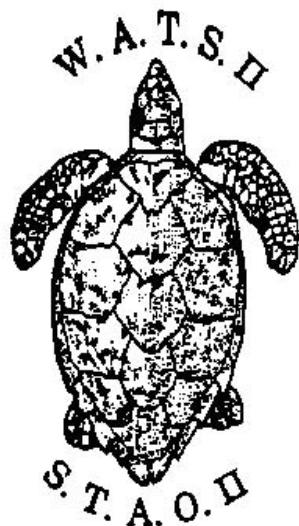

Each article has been scanned from the original document. Errors in the scan have been corrected; however, to be true to the original content (as closely as we can discern it), potential errors of content have not been corrected. This article can be cited (with the number of pages based on the layout of the original document) as:

Foster, N. 1987. National Report to WATS II for the United States. Prepared for the Second Western Atlantic Turtle Symposium (WATS II), 12-16 October 1987, Mayagüez, Puerto Rico. Doc. 054. 74 pages.

Karen L. Eckert
WIDECAST Executive Director
June 2009

THE NATIONAL REPORT

EL REPORTE NACIONAL

**UNITED STATES OF AMERICA
ESTADOS UNIDOS**

NATIONAL REPRESENTATIVE / EL REPRESENTANTE NACIONAL

NANCY FOSTER

**Western Atlantic Turtle Symposium
Simposio de Tortugas del Atlantico Occidental
12-17 October/Octubre 1987
Mayagüez, Puerto Rico**

The U.S. National Report represents the efforts of many people. The following persons are gratefully acknowledged for their contribution of data:

- Dr. Jack Musick - College of William and Mary, Virginia Institute of Marine Sciences
- Mr. Tom Henson - North Carolina Wildlife Resources Commission
- Ms. Sally Murphy - South Carolina Department of Wildlife and Marine Resources
- Dr. Jim Richardson & Ms. Thelma Richardson - University of Georgia, Institute of Ecology
- Mr. Walt Conley - Florida Department of Natural Resources
- Dr. Ted Simon - Gulf Islands National Seashore, Mississippi
- Mr. Pete Juneau - Louisiana Department of Wildlife and Fisheries
- Dr. Gary Matlock - Texas Department of Parks and Wildlife

Mr. Tom Chewning of the National Marine Fisheries Service, Southeast Fisheries Center, Miami Laboratory developed the WATS II data base and National Report format. Dr. Nancy Thompson, also of the Miami Laboratory, coordinated the compilation of data.

This report follows the prescribed format as requested. Not all the data are included in this formatted report. However, all these data are on the diskette which constitutes the official report. This diskette is already merged into the WATS II data base maintained at the University of Puerto Rico, Sea Grant Office, Mayaguez, Puerto Rico. The format of this diskette follows.

WATS II REPORT/DATA SET

The National Report of the United States

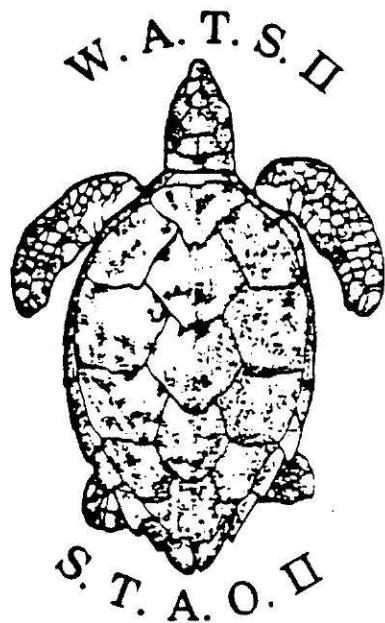

Nancy Foster

12 October 1987

WATS2 054

THE NATIONAL REPORT EL REPORTE NACIONAL

UNITED STATES OF AMERICA
ESTADOS UNIDOS

NATIONAL REPRESENTATIVE/EL REPRESENTANTE NACIONAL

NANCY FOSTER

Western Atlantic Turtle Symposium

Simposio de Tortugas del Atlántico Occidental

12-17 October/Octubre 1987

Mayaguez, Puerto Rico

The U.S. National Report represents the efforts of many people. The following persons are gratefully acknowledged for their contribution of data:

Dr. Jack Musick - College of William and Mary, Virginia
Institute of Marine Sciences

Mr. Tom Henson - North Carolina Wildlife Resources Commission

Ms. Sally Murphy - South Carolina Department of Wildlife
and Marine Resources

Dr. Jim Richardson and Ms. Thelma Richardson - University of
Georgia, Institute of Ecology

Mr. Walt Conley - Florida Department of Natural Resources

Dr. Ted Simon - Gulf Islands National Seashore, Mississippi

Mr. Pete Juneau - Louisiana Department of Wildlife and Fisheries

Dr. Gary Matlock - Texas Department of Parks and Wildlife

Mr. Tom Chewning of the National Marine Fisheries Service, Southeast Fisheries
Center, Miami Laboratory developed the WATS II data base and National Report
format.

Dr. Nancy Thompson, also of the Miami Laboratory, coordinated the compilation
of data.

This report follows the prescribed format as requested. Not all the data are
included in this formatted report. However, all these data are on the diskette
which constitutes the official report. This diskette is already merged into
the WATS II data base maintained at the University of Puerto Rico, Sea Grant
Office, Mayaguez, Puerto Rico. The format of this diskette follows.
